Subject Index

Volume 19, January-June 1992

A

Acetylcholine
Attenuated Afferent Arteriolar Response to Acetylcholine in Goldblatt Hypertension, 785
Mechanisms of Cardiovascular Responses to Glycine Injected Into the Dorsal Vagal Motor Nucleus in Rat, II-187
Nitric Oxide Inactivates Endothelium-Derived Contracting Factor in the Rat Aorta, 442
Prostaglandin H_2 and Thromboxane A_2 Are Contractile Factors in Intrarenal Arteries of Spontaneously Hypertensive Rats, 795

Actins
Renal Injury From Angiotensin II–Mediated Hypertension, 464

Adenoma
19-Nor-deoxycorticosterone Production From Aldosterone-Producing Adenomas, 362

Adenosine
Adenosine Activates a Vascular Renin-Angiotensin System in Hypertensive Subjects, 672
Age-Related Changes in P_2-Purinergic Receptors on Vascular Smooth Muscle and Endothelium, 286
Endothelium-Dependent and Endothelium-Independent Effects of Adenosine Diphosphate in Renovascular Hypertension, II-224

Adenosine triphosphatase, sodium-potassium
Aldosterone Reduces Baroreceptor Discharge in the Dog, 270

Adipose tissue
Tissue-Specific Nutritional Regulation of Angiotensinogen in Adipose Tissue, 339

Adolescents
Blood Pressure Control in Children of Cordoba, Argentina, II-273
Familial Aggregation of Arterial Blood Pressure and Possible Genetic Influence, II-214

Adrenal glands
Local Renin-Angiotensin System in Human Adrenals and Aldosteronomas, 702
Rat Adrenal Cortex Is a Source of a Circulating Ouabainlike Compound, 721
Role of Tissue Renin in the Pathophysiology of Hypertension in TGR(mREN2)27 Rats, 681

Adrenergic β-receptor blockaders
Effect of Antihypertensive Therapy on Weight Loss, 393

Adrenergic nerve
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161

Adrenergic receptors (See Receptors, adrenergic)

Adrenocorticotropic hormone
Effect of Angiotensin II on Renin Production by Rat Adrenal Glomerulosa Cells in Culture, 263

Age factors
Age-Related Changes in P_2-Purinergic Receptors on Vascular Smooth Muscle and Endothelium, 286
Blood Pressure Control in Children of Cordoba, Argentina, II-273
Cardiovascular Determinants of Carotid Artery Disease: The Rotterdam Elderly Study, 717
Orthostatic Hypotension in Older Adults: The Cardiovascular Health Study, 508

Albuminuria
The Zucker Rat Model of Obesity, Insulin Resistance, Hyperlipidemia, and Renal Injury, I-110

Alcohol
Effectiveness of Advice to Reduce Alcohol Consumption in Hypertensive Patients, 79
Relation Between Job Strain, Alcohol, and Ambulatory Blood Pressure, 488

Alcohol-induced hypertension
Magnesium Supplementation Prevents the Development of Alcohol-Induced Hypertension, 175

Aldosterone
19-Nor-deoxycorticosterone Production From Aldosterone-Producing Adenomas, 362
Aldosterone Reduces Baroreceptor Discharge in the Dog, 270
Aldosterone Regulation of Gene Transcription Leading to Control of Ion Transport, 221
Are Arterial Pressure and Deformation the Sole Determinants of Baroreceptor Activity? Importance of Humoral and Endothelial Modulation in Normal and Disease States, 278
Endocrine Sodium and Volume Regulation in Familial Hyperkalemia With Hypertension, 371
Genetic Influences on the Urinary Excretion of Aldosterone in Children, 192
Local Renin-Angiotensin System in Human Adrenals and Aldosteronomas, 702

Aldosterone-induced hypertension
Are Arterial Pressure and Deformation the Sole Determinants of Baroreceptor Activity? Importance of Humoral and Endothelial Modulation in Normal and Disease States, 278

Amiloride
Inhibition of Atrial Natriuretic Peptide–Induced Natriuresis by Plasma Hydrolysates Containing Pepsanurin, II-243

Aminopeptidases
Inhibition by Converting Enzyme Inhibitors of Pig Kidney Aminopeptidase P, 281

Amylin
Hyperamylinemia, Hyperinsulinemia, and Insulin Resistance in Genetically Obese LA/N-*cp* Rats, I-101

Angiotensin antagonists
Central DuP 753 Does Not Lower Blood Pressure in Spontaneously Hypertensive Rats, 668
Depressor Effect of Blocking Angiotensin Subtype 1 Receptors in Anterior Hypothalamus, 475

Angiotensin converting enzyme
Effect of Bradykinin on Isolated Mesenteric Arteries of the Rat, II-251
Facilitation of Noradrenergic Transmission by Angiotensin in Hypertensive Rats, II-30
In Vivo Metabolism of Angiotensin I by Neutral Endopeptidase (EC 3.4.24.11) in Spontaneously Hypertensive Rats, 692
Increased Vascular Formation of Angiotensin II in One-Kidney, One Clip Hypertension, 575
Local Renin-Angiotensin System in Human Adrenals and Aldosteronomas, 702
Production of Angiotensin-(1–7) by Human Vascular Endothelium, II-56

Angiotensin converting enzyme inhibitors
Effect of Antihypertensive Treatment on Focal Cerebral Infarction, 713
Effect of Bradykinin on Isolated Mesenteric Arteries of the Rat, II-251
Effect of Enalapril on the Inotropic Response to Isoproterenol in Renal Hypertensive Rats, II-125
Effects of Renin-Angiotensin System Blockade in Guinea Pigs, 255
Increased Vascular Angiotensin Formation in Female Rats Harboring the Mouse *Ren-2* Gene, 687
Inhibition by Converting Enzyme Inhibitors of Pig Kidney Aminopeptidase P, 281
Obesity Hypertension: Converting Enzyme Inhibitors and Calcium Antagonists, I-119

Quality of Life With Three Antihypertensive Treatments: Cilazapril, Atenolol, Nifedipine, 499
Renal Abnormalities in Normotensive Insulin-Dependent Diabetic Offspring of Hypertensive Parents, 376
Role of Cardiac Angiotensin II in Isoproterenol-Induced Left Ventricular Hypertrophy, 708

Angiotensin I
Effects of Renin-Angiotensin System Blockade in Guinea Pigs, 255
In Vivo Metabolism of Angiotensin I by Neutral Endopeptidase (EC 3.4.24.11) in Spontaneously Hypertensive Rats, 692
Production of Angiotensin-(1–7) by Human Vascular Endothelium, II-56

Angiotensin II
Adenosine Activates a Vascular Renin-Angiotensin System in Hypertensive Subjects, 672
Altered Signal Transduction in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, II-142
Angiotensin II Receptors in the Solitary-Vagal Area of Hypertensive Rats, 355
Angiotensin II and Renal Functional Reserve in Rats With Goldblatt Hypertension, 790
Antagonist Effect of a Receptor-Mimicking Peptide Encoded by Human Angiotensin II Complementary RNA, 345
C-Type Natriuretic Peptide Inhibits Thrombin- and Angiotensin II–Stimulated Endothelin Release via Cyclic Guanosine 3′,5′-Monophosphate, 320
Depressor Effect of Blocking Angiotensin Subtype 1 Receptors in Anterior Hypothalamus, 475
Differential Actions of Angiotensin II and Angiotensin-(1–7) on Transmitter Release, II-41
Effect of Angiotensin II on Renin Production by Rat Adrenal Glomerulosa Cells in Culture, 263
Effects of Renin-Angiotensin System Blockade in Guinea Pigs, 255
Endothelin Stimulated by Angiotensin II Augments Contractility of Spontaneously Hypertensive Rat Resistance Arteries, 131
Endothelium-Derived Contracting Factors, 117
Hypertensinogenic Mechanisms Mediated by Renal Actions of Renin-Angiotensin System, I-18
In Vivo Metabolism of Angiotensin I by Neutral Endopeptidase (EC 3.4.24.11) in Spontaneously Hypertensive Rats, 692
Kinins, Nitric Oxide, and the Hypotensive Effect of Captopril and Ramiprilat in Hypertension, 138
Local Renin-Angiotensin System in Human Adrenals and Aldosteronomas, 702
Possible Role of the Vascular Renin-Angiotensin System in Hypertension and Vascular Hypertrophy, II-62
Potentiation of Inositol Trisphosphate Production by Dexamethasone, 109
Renal Injury From Angiotensin II–Mediated Hypertension, 464
Role of Cardiac Angiotensin II in Isoproterenol-Induced Left Ventricular Hypertrophy, 708

Angiotensin receptors (See Receptors, angiotensin)

Angiotensinogen
Androgen-Dependent Angiotensinogen and Renin Messenger RNA Expression in Hypertensive Rats, 456
Increased Vascular Formation of Angiotensin II in One-Kidney, One Clip Hypertension, 575
Local Renin-Angiotensin System in Human Adrenals and Aldosteronomas, 702
Possible Role of the Vascular Renin-Angiotensin System in Hypertension and Vascular Hypertrophy, II-62
Tissue-Specific Nutritional Regulation of Angiotensinogen in Adipose Tissue, 339

Angiotensins
Central DuP 753 Does Not Lower Blood Pressure in Spontaneously Hypertensive Rats, 668
Differential Actions of Angiotensin II and Angiotensin-(1–7) on Transmitter Release, II-41
Increased Vascular Formation of Angiotensin II in One-Kidney, One Clip Hypertension, 575
Induction of Endothelin-1 Gene by Angiotensin and Vasopressin in Endothelial Cells, 753
Obesity-Associated Hypertension: Hyperinsulinemia and Renal Mechanisms, I-45
Production of Angiotensin-(1–7) by Human Vascular Endothelium, II-56

Animal studies (See Dog studies, Guinea pig studies, Monkey studies, Rat studies)

Animals, newborn
Expression of α-Smooth Muscle Actin in the Developing Kidney Vasculature, II-168

Animals, transgenic
Increased Vascular Angiotensin Formation in Female Rats Harboring the Mouse *Ren-2* Gene, 687

Anoxemia
Arterial Chemoreceptor Reflex and Hypertension, 562
Repetitive, Episodic Hypoxia Causes Diurnal Elevation of Blood Pressure in Rats, 555

Anoxia
Arterial Chemoreceptor Reflex and Hypertension, 562
Endothelium-Derived Contracting Factors, 117
Repetitive, Episodic Hypoxia Causes Diurnal Elevation of Blood Pressure in Rats, 555

Antiarrhythmia agents
Modulation of Potassium Channels by Antiarrhythmic and Antihypertensive Drugs, 228

Antibodies, monoclonal
Antagonist Effect of a Receptor-Mimicking Peptide Encoded by Human Angiotensin II Complementary RNA, 345
Characterization of a Monoclonal Antibody Specific for Human Active Renin, 249
Pressor Effect of Blocking Atrial Natriuretic Peptide in Nucleus Tractus Solitarii, 198

Antidiuretic hormones (See Vasopressins)

Antihypertensive therapy
Angiotensin Converting Enzyme Inhibitors Versus Calcium Antagonists in the Treatment of Diabetic Hypertensive Patients, II-237
Antagonist Effect of a Receptor-Mimicking Peptide Encoded by Human Angiotensin II Complementary RNA, 345
Antihypertensive Effect of γ-Linolenic Acid in Spontaneously Hypertensive Rats, II-111
Antihypertensive Therapy and Cardiovascular Risk: Are All Antihypertensives Equal? I-124
Cadralazine for the Treatment of Preeclampsia: An Open, Noncomparative, Dose-Finding Pilot Study, II-132
Effect of Antihypertensive Treatment on Focal Cerebral Infarction, 713
Effect of Blocking Angiotensin II Receptor Subtype on Rat Sympathetic Nerve Function, 663
Effects of Antihypertensive Therapy on Insulin Resistance, I-116
Effects of Insulin on Renal Sodium Excretion, I-78
Lovastatin and Coadministered Antihypertensive/Cardiovascular Agents, 242
Modulation of Potassium Channels by Antiarrhythmic and Antihypertensive Drugs, 228
Obesity Hypertension: Converting Enzyme Inhibitors and Calcium Antagonists, I-119
Obesity, the Sympathetic Nervous System, and Essential Hypertension, I-67
Quality of Life With Three Antihypertensive Treatments: Cilazapril, Atenolol, Nifedipine, 499

Aorta
Endothelin Vascular Receptors and Responses in Deoxycorticosterone Acetate–Salt Hypertensive Rats, II-98
Polymerase Chain Reaction Analysis of Renin in Rat Aortic Smooth Muscle, 697

Apnea
Repetitive, Episodic Hypoxia Causes Diurnal Elevation of Blood Pressure in Rats, 555

Aprotinin
Localization of Components of the Kallikrein-Kinin System in the Kidney: Relation to Renal Function: State of the Art Lecture, II-10
Arginine
Endothelium-Dependent Relaxation and L-Arginine Metabolism in Genetic Hypertension, 435
Nitric Oxide Inactivates Endothelium-Derived Contracting Factor in the Rat Aorta, 442
Role of Nitric Oxide in Renal Papillary Blood Flow and Sodium Excretion, 766
Sympathetic Modulation of Endothelium-Derived Relaxing Factor, 643
Arginine vasopressin
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255
Potentiation of Inositol Trisphosphate Production by Dexamethasone, 109
Arousal
Arterial Chemoreceptor Reflex and Hypertension, 562
Arterial hypertension
Arterial Chemoreceptor Reflex and Hypertension, 562
Chemical Renal Medullectomy and Arterial Pressure Response to Sinoaortic Denervation, II-116
Arterial pressure
Chemical Renal Medullectomy and Arterial Pressure Response to Sinoaortic Denervation, II-116
Arteries (See also Carotid, Mesenteric, Renal arteries)
Calcium, Phosphoinositide, and 1,2-Diacylglycerol Responses of Blood Vessels of Deoxycorticosterone Acetate–Salt Hypertensive Rats to Endothelin-1, 743
Enhanced Myogenic Responsiveness of Renal Interlobular Arteries in Spontaneously Hypertensive Rats, 153
Arterioles
Reactivity of Small Blood Vessels in Hypertension: Relation with Structural Changes: State of the Art Lecture, II-1
Renin Distribution in the Rabbit Renal Microvasculature, II-36
Aspartic proteinases
Polymerase Chain Reaction Analysis of Renin in Rat Aortic Smooth Muscle, 697
Atenolol
Effectiveness of Atenolol in the Treatment of Hypertension During Pregnancy, II-129
Atherosclerosis
Atrial Natriuretic Polypeptide as a Novel Antigrowth Factor of Endothelial Cells, 758
Changes in the Aortic Wall Oxygen Tensions of Hypertensive Rabbits: Hypertension and Aortic Wall Oxygen, 33
Atrial natriuretic peptides (See Natriuretic peptides, atrial)
Autonomic nervous system
Increased Norepinephrine Spillover Into the Jugular Veins in Essential Hypertension, 62
Sympathetic Modulation of Endothelium-Derived Relaxing Factor, 643
Autoregulation (See Homeostasis)
Awards
CIBA Award for Hypertension Research, 818
Eighth Annual Marion Merrell Dow Hypertension Research Clinical Fellowship Award, 820
Second Bristol-Myers Squibb Lifetime Achievement Award in Hypertension, 819

B

Baroreceptor hypertension
Early Depression of the Baroreceptor Sensitivity During Onset of Hypertension, II-198
Baroreceptor reflex
Cardiac Parasympathetic Hyperresponsiveness in Spontaneously Hypertensive Rats, 653
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Early Depression of the Baroreceptor Sensitivity During Onset of Hypertension, II-198
Baroreceptors (See also Pressoreceptors)
Aldosterone Reduces Baroreceptor Discharge in the Dog, 270
Are Arterial Pressure and Deformation the Sole Determinants of Baroreceptor Activity? Importance of Humoral and Endothelial Modulation in Normal and Disease States, 278
Arterial Baroreceptor Reflex Function in Borderline Hypertensive Rats, 56
Baroreceptor Reflex Control of Heart Rate During Development of Coarctation Hypertension, II-159
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Changes in Vascular Resistance During Carotid Occlusion in Normal and Baroreceptor-Denervated Rats, II-149
Differential Modulation by μ- and δ-Opioids on Baroreceptor Reflex in Conscious Rabbits, 648
Early Depression of the Baroreceptor Sensitivity During Onset of Hypertension, II-198
Effect of Selective Denervation of Baroreceptors on Pulmonary Ventilation and Arterial Pressure Lability in Rat, II-182
Effects of 1 M NaCl Cerebroventricular Injection on Renal and Baroreceptor Reflex Functions, II-94
Renal Denervation Normalizes Pressure and Baroreceptor Reflex in High Renin Hypertension in Conscious Rats, II-17
Salt-Dependent Hypertension in the Sinoaortic-Denervated Rat, 658
Bay K 8644
Calcitonin Gene-Related Peptide in Noradrenergic Transmission in Rat Hypothalamus, 639
BioBreeding rats
Renin and Angiotensinogen Expression During the Evolution of Diabetes, 70
β-Blockers
Quality of Life With Three Antihypertensive Treatments: Cilazapril, Atenolol, Nifedipine, 499
Blood flow
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255
Pressure Natriuresis: Role of Renal Interstitial Hydrostatic Pressure, I-9
Blood pressure
A Ca^{2+}-Dependent K^+ Current Is Enhanced in Arterial Membranes of Hypertensive Rats, 301
A New Model for Diurnal Blood Pressure Profiling: Square Wave Fit Compared With Conventional Methods, 595
Are Arterial Pressure and Deformation the Sole Determinants of Baroreceptor Activity? Importance of Humoral and Endothelial Modulation in Normal and Disease States, 278
Blood Pressure Control in Children of Cordoba, Argentina, II-273
Blunted Natriuretic Response to an Acute Sodium Load in Obese Hypertensive Dogs, I-96
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Chronic Lesion of Rostral Ventrolateral Medulla in Spontaneously Hypertensive Rats, II-154
Cumulative Sums in Quantifying Circadian Blood Pressure Patterns, 93
Effects of Renin-Angiotensin System Blockade in Guinea Pigs, 255
Familial Aggregation of Arterial Blood Pressure and Possible Genetic Influence, II-214
Ganglionic Blockade With Tetraethylammonium in Conscious Rats, 814
High Calcium Diet Augments Vascular Potassium Relaxation in Hypertensive Rats, 85
Higher Blood Pressure in Adults With Less Education; Some Explanations From INTERSALT, 237
Hypertension During Chronic Hyperinsulinemia in Rats Is Not Salt-Sensitive, I-83
Hypertensive Strains and Normotensive 'Control' Strains: How Closely Are They Related? 419
Identification of Cardiovascular Neurons in the Rostral Ventromedial Medulla in Anesthetized Rats, II-193

Influence of Short-term Blood Pressure Variability on Blood Pressure Determinations, 606
Kidneys and Fluids in Pressure Regulation: Small Volume but Large Pressure Changes, I-2
Mechanisms of Cardiovascular Responses to Glycine Injected Into the Dorsal Vagal Motor Nucleus in Rat, II-187
Mild Exercise Decreases Plasma Endogenous Digitalislike Substance in Hypertensive Individuals, II-231
Obesity-Associated Hypertension: Hyperinsulinemia and Renal Mechanisms, I-45
Pressor Responsiveness in Corticosteroid-Induced Hypertension in Humans, 567
Pressure Natriuresis: Role of Renal Interstitial Hydrostatic Pressure, I-9
Pressure-Induced Activation of Membrane K^+ Current in Rat Saphenous Artery, 725
Production of Angiotensin-(1–7) by Human Vascular Endothelium, II-56
Prolonged Water Immersion: Effects on Blood Pressure Maturation in Normotensive Rats, 482
Renal Transplantation Between Male and Female Spontaneously Hypertensive Rats, 431
Repetitive, Episodic Hypoxia Causes Diurnal Elevation of Blood Pressure in Rats, 555
Sympathetic Modulation of Endothelium-Derived Relaxing Factor, 643

Blood pressure determination
Influence of Short-term Blood Pressure Variability on Blood Pressure Determinations, 606

Blood pressure monitoring, ambulatory
A New Model for Diurnal Blood Pressure Profiling: Square Wave Fit Compared With Conventional Methods, 595
Bayesian Analysis Supports Use of Ambulatory Blood Pressure Monitors for Screening, II-268
Cumulative Sums in Quantifying Circadian Blood Pressure Patterns, 93
Relation Between Job Strain, Alcohol, and Ambulatory Blood Pressure, 488

Blood volume
Kidneys and Fluids in Pressure Regulation: Small Volume but Large Pressure Changes, I-2

Blotting, Northern
Renin and Angiotensinogen Expression During the Evolution of Diabetes, 70

Body fluid compartments
Endocrine Sodium and Volume Regulation in Familial Hyperkalemia With Hypertension, 371

Body mass index
Familial Aggregation of Arterial Blood Pressure and Possible Genetic Influence, II-214
Relation of Central Hemodynamics to Obesity and Body Fat Distribution, 520

Borderline hypertension
Insulin Increases Sympathetic Activity but Not Blood Pressure in Borderline Hypertensive Humans, 621

Borderline hypertensive rats
Arterial Baroreceptor Reflex Function in Borderline Hypertensive Rats, 56

Bradycardia
Baroreceptor Reflex Control of Heart Rate During Development of Coarctation Hypertension, II-159

Bradykinin
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Effect of Intrarenal Bradykinin Infusion on Vasopressin Release in Rabbits, 799
Effect of Protein Kinase C and Calcium on Bradykinin-Mediated Contractions of Rabbit Vessels, II-87
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255
Kinins, Nitric Oxide, and the Hypotensive Effect of Captopril and Ramiprilat in Hypertension, 138

Brain
Accelerated Secretion of Brain Natriuretic Peptide From the Hypertrophied Ventricles in Experimental Malignant Hypertension, 206
Angiotensin II Receptors in the Solitary-Vagal Area of Hypertensive Rats, 355
Increased Norepinephrine Spillover Into the Jugular Veins in Essential Hypertension, 62
Pressor Effect of Blocking Atrial Natriuretic Peptide in Nucleus Tractus Solitarii, 198

Brief reviews (See Review literature)

C

Cadralazine
Cadralazine for the Treatment of Preeclampsia: An Open, Noncomparative, Dose-Finding Pilot Study, II-132

Hyperlipidemia
The Zucker Rat Model of Obesity, Insulin Resistance, Hyperlipidemia, and Renal Injury, I-110
Hypertension (See also Alcohol-induced, Aldosterone-induced, Arterial, Baroreceptor, Chronic, Coarctation, Essential, Experimental, Genetic, Goldblatt, Malignant, Mineralocorticoid, Obesity-induced, Pregnancy-induced, Renin-dependent, Renovascular, Sodium-dependent, and Spontaneous hypertension)
Angiotensin Converting Enzyme Inhibitors Versus Calcium Antagonists in the Treatment of Diabetic Hypertensive Patients, II-237
Obese Zucker Rats Are Normotensive on Normal and Increased Sodium Intake, I-90
Reduced Influence of Nitric Oxide on Arteriolar Tone in Hypertensive Dahl Rats, 290

Hypertrophy
Accelerated Secretion of Brain Natriuretic Peptide From the Hypertrophied Ventricles in Experimental Malignant Hypertension, 206
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535
Effect of Enalapril on the Inotropic Response to Isoproterenol in Renal Hypertensive Rats, II-125
Left Ventricular Insulin-like Growth Factor I Increases in Early Renal Hypertension, 25
Possible Role of the Vascular Renin-Angiotensin System in Hypertension and Vascular Hypertrophy, II-62
Rapid Eye Movement Sleep Deprivation and Hypertension: Genetic Influence, II-202
Role of Cardiac Angiotensin II in Isoproterenol-Induced Left Ventricular Hypertrophy, 708
Hypokalemia
Hypokalemia, Glucose Intolerance, and Hyperinsulinemia During Diuretic Therapy, II-26
Hypotension, orthostatic
Orthostatic Hypotension in Older Adults: The Cardiovascular Health Study, 508
Plasma Norepinephrine Responses to Head-Up Tilt Are Misleading in Autonomic Failure, 628
Hypothalamus
Calcitonin Gene-Related Peptide in Noradrenergic Transmission in Rat Hypothalamus, 639
Differential Actions of Angiotensin II and Angiotensin-(1–7) on Transmitter Release, II-41
Hypoxia (See Anoxia)

I

Immersion
Prolonged Water Immersion: Effects on Blood Pressure Maturation in Normotensive Rats, 482
Immune system
The Immune System and Hypertension, I-36
Immunoassay
Characterization of a Monoclonal Antibody Specific for Human Active Renin, 249
Immunoblotting
Angiotensin II–Induced Changes in Guanine Nucleotide Binding and Regulatory Proteins, 146
Immunocytochemistry (See Immunohistochemistry)
Immunogenetics
Essential Hypertension and Histocompatibility Antigens: An Association Study, 400
Immunohistochemistry
Expression of α-Smooth Muscle Actin in the Developing Kidney Vasculature, II-168
Mechanisms of Cardiovascular Responses to Glycine Injected Into the Dorsal Vagal Motor Nucleus in Rat, II-187
Renin Distribution in the Rabbit Renal Microvasculature, II-36
Renin and Angiotensinogen Expression During the Evolution of Diabetes, 70
Indomethacin
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255
Inositol phosphates
Endothelin Vascular Receptors and Responses in Deoxycorticosterone Acetate–Salt Hypertensive Rats, II-98
Phospholipase C Responses in Cells From Spontaneously Hypertensive Rats, 446
Potentiation of Inositol Trisphosphate Production by Dexamethasone, 109
Insulin
Cardiovascular Regulation in Obesity-Induced Hypertension, I-56
Effects of Antihypertensive Therapy on Insulin Resistance, I-116
Effects of Insulin on Renal Sodium Excretion, I-78
Forearm Resistance Vessel Abnormalities and Insulin Resistance in Obese Adolescents, 615
Hyperinsulinemia: Possible Role in Obesity-Induced Hypertension, I-61
Hypertension During Chronic Hyperinsulinemia in Rats Is Not Salt-Sensitive, I-83
Hypokalemia, Glucose Intolerance, and Hyperinsulinemia During Diuretic Therapy, II-26
Insulin Enhances Pressor Responses to Norepinephrine in Rat Mesenteric Vasculature, II-105
Insulin Increases Sympathetic Activity but Not Blood Pressure in Borderline Hypertensive Humans, 621
Insulin Resistance Versus Insulin Secretion in the Hypertension of Obesity, 385
Obese Zucker Rats Are Normotensive on Normal and Increased Sodium Intake, I-90
Obesity, the Sympathetic Nervous System, and Essential Hypertension, I-67
Obesity-Associated Hypertension: Hyperinsulinemia and Renal Mechanisms, I-45
The Zucker Rat Model of Obesity, Insulin Resistance, Hyperlipidemia, and Renal Injury, I-110
Insulin resistance
Hyperamylinemia, Hyperinsulinemia, and Insulin Resistance in Genetically Obese LA/N-*cp* Rats, I-101
Insulin-like growth factors
Left Ventricular Insulin-like Growth Factor I Increases in Early Renal Hypertension, 25
Interferon type II
Interferon Gamma Attenuates Hypertensive Renal Injury in Salt-Sensitive Dahl Rats, 804
Ion channels (See also Potassium channels)
A Ca^{2+}-Dependent K^+ Current Is Enhanced in Arterial Membranes of Hypertensive Rats, 301
Enhanced Myogenic Responsiveness of Renal Interlobular Arteries in Spontaneously Hypertensive Rats, 153
Modulation of Potassium Channels by Antiarrhythmic and Antihypertensive Drugs, 228
Molecular Biology of the Calcium Antagonist Receptor, 19
Ischemia
Changes in Vascular Resistance During Carotid Occlusion in Normal and Baroreceptor-Denervated Rats, II-149
Isoproterenol
Effect of Enalapril on the Inotropic Response to Isoproterenol in Renal Hypertensive Rats, II-125
Role of Cardiac Angiotensin II in Isoproterenol-Induced Left Ventricular Hypertrophy, 708

K

Kallikrein
Localization of Components of the Kallikrein-Kinin System in the Kidney: Relation to Renal Function: State of the Art Lecture, II-10
Submandibular Enzymatic Vasoconstrictor Messenger RNA in Rat Kidney, II-262
Kallikrein-kinin system
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Localization of Components of the Kallikrein-Kinin System in the Kidney: Relation to Renal Function: State of the Art Lecture, II-10
Kidney (See also Renal function)
Altered Dopaminergic Responses in Hypertension, 589
Androgen-Dependent Angiotensinogen and Renin Messenger RNA Expression in Hypertensive Rats, 456
Blunted Natriuretic Response to an Acute Sodium Load in Obese Hypertensive Dogs, I-96
Doppler Ultrasonography for the Detection of Renal Artery Stenosis in Transplanted Kidneys, II-207
Effects of 1 M NaCl Cerebroventricular Injection on Renal and Baroreceptor Reflex Functions, II-94
Expression of α-Smooth Muscle Actin in the Developing Kidney Vasculature, II-168
Inhibition of Atrial Natriuretic Peptide–Induced Natriuresis by Plasma Hydrolysates Containing Pepsanurin, II-243

Interferon Gamma Attenuates Hypertensive Renal Injury in Salt-Sensitive Dahl Rats, 804
Kidneys and Fluids in Pressure Regulation: Small Volume but Large Pressure Changes, I-2
Nitric Oxide Modulates Vascular Tone in Preglomerular Arterioles, 770
Normalization of Pressure–Natriuresis by Nisoldipine in Spontaneously Hypertensive Rats, 49
Obesity-Associated Hypertension: Hyperinsulinemia and Renal Mechanisms, I-45
On the Role of Renal α-Adrenergic Receptors in Spontaneously Hypertensive Rats, 365
Pressure Independence of Renin Release by Isolated Kidneys of Lyon Hypertensive Rats, 582
Renal Transplantation Between Male and Female Spontaneously Hypertensive Rats, 431
Renin and Angiotensinogen Expression During the Evolution of Diabetes, 70
Role of Nitric Oxide in Renal Papillary Blood Flow and Sodium Excretion, 766
Submandibular Enzymatic Vasoconstrictor Messenger RNA in Rat Kidney, II-262
Sympathetic Neural Control of the Kidney in Hypertension, I-28

Kidney concentrating ability
Normalization of Pressure–Natriuresis by Nisoldipine in Spontaneously Hypertensive Rats, 49

Kidney failure
Diabetes Mellitus and Hypertension, 403

Kidney medulla
Chemical Renal Medullectomy and Arterial Pressure Response to Sinoaortic Denervation, II-116
Normalization of Pressure–Natriuresis by Nisoldipine in Spontaneously Hypertensive Rats, 49
Role of Nitric Oxide in Renal Papillary Blood Flow and Sodium Excretion, 766

Kidney tubules
Renal Injury From Angiotensin II–Mediated Hypertension, 464

Kininase II (See Angiotensin converting enzyme)

Kininogens
Localization of Components of the Kallikrein-Kinin System in the Kidney: Relation to Renal Function: State of the Art Lecture, II-10

Kinins
Centrally Infused Bradykinin Increases Baroreceptor Reflex Sensitivity, II-176
Effect of Bradykinin on Isolated Mesenteric Arteries of the Rat, II-251
Kinins, Nitric Oxide, and the Hypotensive Effect of Captopril and Ramiprilat in Hypertension, 138
Localization of Components of the Kallikrein-Kinin System in the Kidney: Relation to Renal Function: State of the Art Lecture, II-10

L

Lactates
Mild Exercise Decreases Plasma Endogenous Digitalislike Substance in Hypertensive Individuals, II-231

Letters to the Editor
Analysis of Na^+ Pump Genes, 495
Modeling Blood Pressure Profiles, 496
Response to Analysis of Na^+ Pump Genes, 495
Response to Modeling Blood Pressure Profiles, 497
Response to "White Coat" Hypertension, 219
"White Coat" Hypertension, 219

Linoleic acids
Antihypertensive Effect of γ-Linolenic Acid in Spontaneously Hypertensive Rats, II-111

Lipids
Lovastatin and Coadministered Antihypertensive/Cardiovascular Agents, 242

Lithium
Renal Abnormalities in Normotensive Insulin-Dependent Diabetic Offspring of Hypertensive Parents, 378
Role of Nitric Oxide in Mediating Renal Response to Volume Expansion, 780

Liver
Androgen-Dependent Angiotensinogen and Renin Messenger RNA Expression in Hypertensive Rats, 456

Lyon rat
Pressure Independence of Renin Release by Isolated Kidneys of Lyon Hypertensive Rats, 582

Lysine
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535

M

Magnesium
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535
Magnesium Supplementation Prevents the Development of Alcohol-Induced Hypertension, 175

Malignant hypertension
Accelerated Secretion of Brain Natriuretic Peptide From the Hypertrophied Ventricles in Experimental Malignant Hypertension, 206
Ventricular Function by Radionuclide Ventriculography in Malignant Hypertension, II-210

Mathematical computing
Cumulative Sums in Quantifying Circadian Blood Pressure Patterns, 93

Medulla oblongata
Chronic Lesion of Rostral Ventrolateral Medulla in Spontaneously Hypertensive Rats, II-154
Differential Actions of Angiotensin II and Angiotensin-(1–7) on Transmitter Release, II-41
Identification of Cardiovascular Neurons in the Rostral Ventromedial Medulla in Anesthetized Rats, II-193

Medullipin II
Chemical Renal Medullectomy and Arterial Pressure Response to Sinoaortic Denervation, II-116

Mesangial cells (See Glomerular mesangium)

Mesenteric arteries
Endothelin Vascular Receptors and Responses in Deoxycorticosterone Acetate–Salt Hypertensive Rats, II-98
Endothelium-Dependent and Endothelium-Independent Effects of Adenosine Diphosphate in Renovascular Hypertension, II-224
Insulin Enhances Pressor Responses to Norepinephrine in Rat Mesenteric Vasculature, II-105
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161

Messenger RNA (See RNA, messenger)

Methacholine chloride
Cardiac Parasympathetic Hyperresponsiveness in Spontaneously Hypertensive Rats, 653

***N*-Methylaspartate**
Identification of Cardiovascular Neurons in the Rostral Ventromedial Medulla in Anesthetized Rats, II-193

Microcirculation
Arterial Chemoreceptor Reflex and Hypertension, 562
Attenuated Afferent Arteriolar Response to Acetylcholine in Goldblatt Hypertension, 785
Enhanced Myogenic Responsiveness of Renal Interlobular Arteries in Spontaneously Hypertensive Rats, 153
Nitric Oxide Modulates Vascular Tone in Preglomerular Arterioles, 770
Pressure-Induced Constriction of the Afferent Arteriole of Spontaneously Hypertensive Rats, II-164
Reduced Influence of Nitric Oxide on Arteriolar Tone in Hypertensive Dahl Rats, 290

Microdialysis (See Dialysis)

Microinjections
Depressor Effect of Blocking Angiotensin Subtype 1 Receptors in Anterior Hypothalamus, 475
Pressor Effect of Blocking Atrial Natriuretic Peptide in Nucleus Tractus Solitarii, 198

Microneurography
Insulin Increases Sympathetic Activity but Not Blood Pressure in Borderline Hypertensive Humans, 621

Microperfusion
Pressure-Induced Constriction of the Afferent Arteriole of Spontaneously Hypertensive Rats, II-164

Microspheres
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255

Mild hypertension
Effect of Antihypertensive Therapy on Weight Loss, 393

Mineralocorticoid hypertension
α-Adrenergic Receptors and $^{45}Ca^{2+}$ Efflux in Arteries From Deoxycorticosterone Acetate Hypertensive Rats, 734
Aldosterone Regulation of Gene Transcription Leading to Control of Ion Transport, 221
Pressor Responsiveness in Corticosteroid-Induced Hypertension in Humans, 567

Mineralocorticoids
Role of Tissue Renin in the Pathophysiology of Hypertension in TGR(mREN2)27 Rats, 681

Models, statistical
Cumulative Sums in Quantifying Circadian Blood Pressure Patterns, 93

Molecular biology (See also Tutorials in molecular and cellular biology)
Molecular Biology of the Calcium Antagonist Receptor, 19

Monkey studies
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161

Monoclonal antibodies (See Antibodies, monoclonal)

Muscle, smooth
Expression of α-Smooth Muscle Actin in the Developing Kidney Vasculature, II-168

Muscle, smooth, vascular
A Ca^{2+}-Dependent K^+ Current Is Enhanced in Arterial Membranes of Hypertensive Rats, 301
Actions of Cromakalim in Isolated Human Saphenous Vein, II-121
α-Adrenergic Receptors and $^{45}Ca^{2+}$ Efflux in Arteries From Deoxycorticosterone Acetate Hypertensive Rats, 734
Age-Related Changes in P_2-Purinergic Receptors on Vascular Smooth Muscle and Endothelium, 286
Characterization of Natriuretic Peptide Receptors in Cultured Cells, 762
Effect of Protein Kinase C and Calcium on Bradykinin-Mediated Contractions of Rabbit Vessels, II-87
Effects of a Nonpeptide Vasopressin Antagonist (OPC-21268) on Cytosolic Ca^{2+} Concentration in Vascular and Cardiac Myocytes, 730
High Calcium Diet Augments Vascular Potassium Relaxation in Hypertensive Rats, 85
Na^+-Ca^{2+} Exchange, Myoplasmic Ca^{2+} Concentration, and Contraction of Arterial Smooth Muscle, 308
Phorbol Ester and Atrial Natriuretic Peptide Receptor Response on Vascular Smooth Muscle, 314
Phospholipase C Responses in Cells From Spontaneously Hypertensive Rats, 446
Polymerase Chain Reaction Analysis of Renin in Rat Aortic Smooth Muscle, 697
Potent Constrictor Actions of Endothelin-1, Endothelin-2, and Endothelin-3 in Rat Isolated Portal Vein, II-79
Potentiation of Inositol Trisphosphate Production by Dexamethasone, 109
Pressure-Induced Activation of Membrane K^+ Current in Rat Saphenous Artery, 725
Renal Injury From Angiotensin II–Mediated Hypertension, 464

Myocardium
Effects of a Nonpeptide Vasopressin Antagonist (OPC-21268) on Cytosolic Ca^{2+} Concentration in Vascular and Cardiac Myocytes, 730

N

Naloxone
Differential Modulation by μ- and δ-Opioids on Baroreceptor Reflex in Conscious Rabbits, 648

Natriuresis
Effects of 1 M NaCl Cerebroventricular Injection on Renal and Baroreceptor Reflex Functions, II-94
Pressure Independence of Renin Release by Isolated Kidneys of Lyon Hypertensive Rats, 582
Role of Nitric Oxide in Mediating Renal Response to Volume Expansion, 780
The Effect of Upright Tilt on Nifedipine-Induced Natriuresis, II-22

Natriuretic hormone
Effects of 1 M NaCl Cerebroventricular Injection on Renal and Baroreceptor Reflex Functions, II-94

Natriuretic peptides
Characterization of Natriuretic Peptide Receptors in Cultured Cells, 762

Natriuretic peptides, atrial
Accelerated Secretion of Brain Natriuretic Peptide From the Hypertrophied Ventricles in Experimental Malignant Hypertension, 206
Atrial Natriuretic Polypeptide as a Novel Antigrowth Factor of Endothelial Cells, 758
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535
C-Type Natriuretic Peptide Inhibits Thrombin- and Angiotensin II–Stimulated Endothelin Release via Cyclic Guanosine 3′,5′-Monophosphate, 320
Endocrine Sodium and Volume Regulation in Familial Hyperkalemia With Hypertension, 371
Human C-Type Natriuretic Peptide: Characterization of the Gene and Peptide, 809
Inhibition of Atrial Natriuretic Peptide–Induced Natriuresis by Plasma Hydrolysates Containing Pepsanurin, II-243
Phorbol Ester and Atrial Natriuretic Peptide Receptor Response on Vascular Smooth Muscle, 314
Pressor Effect of Blocking Atrial Natriuretic Peptide in Nucleus Tractus Solitarii, 198
Quantitation of Hypothalamic Atrial Natriuretic Peptide Messenger RNA in Hypertensive Rats, 296

Natriuretic peptides, brain
Human C-Type Natriuretic Peptide: Characterization of the Gene and Peptide, 809

Nervous system (See Autonomic nervous system, Central nervous system, Nitroxidergic nerve, Renal nerves, Sympathetic nervous system, Vagus nerve)

Neovascularization
Atrial Natriuretic Polypeptide as a Novel Antigrowth Factor of Endothelial Cells, 758

Neurotoxins
Chronic Lesion of Rostral Ventrolateral Medulla in Spontaneously Hypertensive Rats, II-154

Nicardipine
Potent Constrictor Actions of Endothelin-1, Endothelin-2, and Endothelin-3 in Rat Isolated Portal Vein, II-79

Nickel
Potent Constrictor Actions of Endothelin-1, Endothelin-2, and Endothelin-3 in Rat Isolated Portal Vein, II-79

Nitric oxide (See also N^G-Nitro-L-arginine, *N*-Methylaspartate)
Endothelium-Dependent and Endothelium-Independent Effects of Adenosine Diphosphate in Renovascular Hypertension, II-224
Inhibition of Nitric Oxide, Bradykinin, and Prostaglandins in Normal Rats, II-255
Kinins, Nitric Oxide, and the Hypotensive Effect of Captopril and Ramiprilat in Hypertension, 138
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161
Nitric Oxide Alters Renal Function and Guanosine 3′,5′-Cyclic Monophosphate, 775
Nitric Oxide Inactivates Endothelium-Derived Contracting Factor in the Rat Aorta, 442

Nitric Oxide Modulates Vascular Tone in Preglomerular Arterioles, 770
Nonprostanoid Endothelium-Derived Factors Inhibit Renin Release, II-68
Reduced Influence of Nitric Oxide on Arteriolar Tone in Hypertensive Dahl Rats, 290
Role of Nitric Oxide in Mediating Renal Response to Volume Expansion, 780
Role of Nitric Oxide in Renal Papillary Blood Flow and Sodium Excretion, 766
Sympathetic Modulation of Endothelium-Derived Relaxing Factor, 643

N^G-Nitro-L-arginine
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161

Nitroprusside
Attenuated Afferent Arteriolar Response to Acetylcholine in Goldblatt Hypertension, 785

Nitroxidergic nerve
Mechanism of Neurally Induced Monkey Mesenteric Artery Relaxation and Contraction, 161

Norepinephrine
Actions of Cromakalim in Isolated Human Saphenous Vein, II-121
α-Adrenergic Receptors and $^{45}Ca^{2+}$ Efflux in Arteries From Deoxycorticosterone Acetate Hypertensive Rats, 734
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535
Calcitonin Gene-Related Peptide in Noradrenergic Transmission in Rat Hypothalamus, 639
Differential Actions of Angiotensin II and Angiotensin-(1–7) on Transmitter Release, II-41
Effects of Insulin on Renal Sodium Excretion, I-78
Endothelin Stimulated by Angiotensin II Augments Contractility of Spontaneously Hypertensive Rat Resistance Arteries, 131
Epinephrine and the Genesis of Hypertension, 1
Forearm Resistance Vessel Abnormalities and Insulin Resistance in Obese Adolescents, 615
Increased Norepinephrine Spillover Into the Jugular Veins in Essential Hypertension, 62
Insulin Enhances Pressor Responses to Norepinephrine in Rat Mesenteric Vasculature, II-105
Insulin Increases Sympathetic Activity but Not Blood Pressure in Borderline Hypertensive Humans, 621
Mild Exercise Decreases Plasma Endogenous Digitalislike Substance in Hypertensive Individuals, II-231
Na^+-Ca^{2+} Exchange, Myoplasmic Ca^{2+} Concentration, and Contraction of Arterial Smooth Muscle, 308
Plasma Norepinephrine Responses to Head-Up Tilt Are Misleading in Autonomic Failure, 628
Potentiation of Inositol Trisphosphate Production by Dexamethasone, 109

Northern blotting (See Blotting, Northern)

Nucleus tractus solitarii
Angiotensin II Receptors in the Solitary-Vagal Area of Hypertensive Rats, 355
Pressor Effect of Blocking Atrial Natriuretic Peptide in Nucleus Tractus Solitarii, 198

Nutrition
Tissue-Specific Nutritional Regulation of Angiotensinogen in Adipose Tissue, 339

O

Obesity
Blunted Natriuretic Response to an Acute Sodium Load in Obese Hypertensive Dogs, I-96
Effects of Insulin on Renal Sodium Excretion, I-78
Forearm Resistance Vessel Abnormalities and Insulin Resistance in Obese Adolescents, 615
Insulin Resistance Versus Insulin Secretion in the Hypertension of Obesity, 385
Obese Zucker Rats Are Normotensive on Normal and Increased Sodium Intake, I-90
Obesity Hypertension: Converting Enzyme Inhibitors and Calcium Antagonists, I-119
Obesity, the Sympathetic Nervous System, and Essential Hypertension, I-67
Relation of Central Hemodynamics to Obesity and Body Fat Distribution, 520
The Zucker Rat Model of Obesity, Insulin Resistance, Hyperlipidemia, and Renal Injury, I-110
Tissue-Specific Nutritional Regulation of Angiotensinogen in Adipose Tissue, 339

Obesity-induced hypertension
Blunted Natriuretic Response to an Acute Sodium Load in Obese Hypertensive Dogs, I-96
Cardiovascular Regulation in Obesity-Induced Hypertension, I-56
Hyperinsulinemia: Possible Role in Obesity-Induced Hypertension, I-61
Tissue-Specific Nutritional Regulation of Angiotensinogen in Adipose Tissue, 339

Occupations
Relation Between Job Strain, Alcohol, and Ambulatory Blood Pressure, 488

Opioid peptides (See Endorphins)

Orthostatic hypotension (See Hypotension, orthostatic)

Ouabain
Aldosterone Reduces Baroreceptor Discharge in the Dog, 270
Na^+-Ca^{2+} Exchange, Myoplasmic Ca^{2+} Concentration, and Contraction of Arterial Smooth Muscle, 308

Ouabainlike compounds
Rat Adrenal Cortex Is a Source of a Circulating Ouabainlike Compound, 721

Oxygen
Changes in the Aortic Wall Oxygen Tensions of Hypertensive Rabbits: Hypertension and Aortic Wall Oxygen, 33

Oxygen radicals
Prostaglandin H_2 and Thromboxane A_2 Are Contractile Factors in Intrarenal Arteries of Spontaneously Hypertensive Rats, 795

P

Pancreas
Hyperamylinemia, Hyperinsulinemia, and Insulin Resistance in Genetically Obese LA/N-*cp* Rats, I-101

Parathyroid hormones
Disturbed Calcium Metabolism in Offspring of Hypertensive Parents, 528

Pathophysiology
Obesity Hypertension: Converting Enzyme Inhibitors and Calcium Antagonists, I-119

Peptide peptidohydrolases
Effect of Bradykinin on Isolated Mesenteric Arteries of the Rat, II-251
In Vivo Metabolism of Angiotensin I by Neutral Endopeptidase (EC 3.4.24.11) in Spontaneously Hypertensive Rats, 692
Production of Angiotensin-(1–7) by Human Vascular Endothelium, II-56

Peptides (See also Calcitonin gene-related peptide, Natriuretic peptides)
C-Type Natriuretic Peptide Inhibits Thrombin- and Angiotensin II–Stimulated Endothelin Release via Cyclic Guanosine 3′,5′-Monophosphate, 320
Inhibition of Atrial Natriuretic Peptide–Induced Natriuresis by Plasma Hydrolysates Containing Pepsanurin, II-243

Perfusion
Pressure-Induced Constriction of the Afferent Arteriole of Spontaneously Hypertensive Rats, II-164

Pertussis toxins
Angiotensin II–Induced Changes in Guanine Nucleotide Binding and Regulatory Proteins, 146
Calcitonin Gene-Related Peptide in Noradrenergic Transmission in Rat Hypothalamus, 639

Pharmacotherapy (See Antihypertensive therapy)
Phentolamine
Na^+-Ca^{2+} Exchange, Myoplasmic $C_a{}^{2+}$ Concentration, and Contraction of Arterial Smooth Muscle, 308
Pheochromocytoma
Characterization of Natriuretic Peptide Receptors in Cultured Cells, 762
Phorbol esters
Phorbol Ester and Atrial Natriuretic Peptide Receptor Response on Vascular Smooth Muscle, 314
Signal Transduction Pathways in Constriction of the Basilar Artery In Vivo, 739
Phorbols
Potent Constrictor Actions of Endothelin-1, Endothelin-2, and Endothelin-3 in Rat Isolated Portal Vein, II-79
Phospholipases
Diminished Phospholipase C Activation by Dopamine in Spontaneously Hypertensive Rats, 102
Endothelin Vascular Receptors and Responses in Deoxycorticosterone Acetate–Salt Hypertensive Rats, II-98
Phospholipids
Calcium, Phosphoinositide, and 1,2-Diacylglycerol Responses of Blood Vessels of Deoxycorticosterone Acetate–Salt Hypertensive Rats to Endothelin-1, 743
Plasma renin activity (See Renin)
Platelet-derived growth factor
Altered Signal Transduction in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, II-142
Plethysmography
Forearm Resistance Vessel Abnormalities and Insulin Resistance in Obese Adolescents, 615
Polymerase chain reaction
Polymerase Chain Reaction Analysis of Renin in Rat Aortic Smooth Muscle, 697
Quantitation of Hypothalamic Atrial Natriuretic Peptide Messenger RNA in Hypertensive Rats, 296
Submandibular Enzymatic Vasoconstrictor Messenger RNA in Rat Kidney, II-262
Polymorphism
Hypertensive Strains and Normotensive 'Control' Strains: How Closely Are They Related? 419
Population studies
Higher Blood Pressure in Adults With Less Education; Some Explanations From INTERSALT, 237
Portal vein
Potent Constrictor Actions of Endothelin-1, Endothelin-2, and Endothelin-3 in Rat Isolated Portal Vein, II-79
Potassium
A Ca^{2+}-Dependent K^+ Current Is Enhanced in Arterial Membranes of Hypertensive Rats, 301
Beneficial Effects of a Potassium- and Magnesium-Enriched Salt Alternative, 535
Effect of Angiotensin II on Renin Production by Rat Adrenal Glomerulosa Cells in Culture, 263
High Calcium Diet Augments Vascular Potassium Relaxation in Hypertensive Rats, 85
High Potassium Diets Greatly Increase Growth-Inhibiting Agents in Aortas of Hypertensive Rats, 749
Modulation of Potassium Channels by Antiarrhythmic and Antihypertensive Drugs, 228
Pressure Natriuresis in Rats During Blockade of the L-Arginine/Nitric Oxide Pathway, 333
Potassium channels
Pressure-Induced Activation of Membrane K^+ Current in Rat Saphenous Artery, 725
Pregnancy-induced hypertension
Cadralazine for the Treatment of Preeclampsia: An Open, Noncomparative, Dose-Finding Pilot Study, II-132
Effectiveness of Atenolol in the Treatment of Hypertension During Pregnancy, II-129
Renin-Angiotensin-Aldosterone System in Normal and Hypertensive Pregnancy: Response to Postural Stimuli, II-74
Pressoreceptors (See also Baroreceptors)
Insulin Enhances Pressor Responses to Norepinephrine in Rat Mesenteric Vasculature, II-105
Pressor Responsiveness in Corticosteroid-Induced Hypertension in Humans, 567
Prostacyclins (See Epoprostenol)
Prostaglandin endoperoxides
Endothelium-Derived Contracting Factors, 117
Prostaglandin synthase
Prostaglandin H_2 and Thromboxane A_2 Are Contractile Factors in Intrarenal Arteries of Spontaneously Hypertensive Rats, 795
Prostaglandins
Actions of Cromakalim in Isolated Human Saphenous Vein, II-121
Antagonist Effect of a Receptor-Mimicking Peptide Encoded by Human Angiotensin II Complementary RNA, 345
Are Arterial Pressure and Deformation the Sole Determinants of Baroreceptor Activity? Importance of Humoral and Endothelial Modulation in Normal and Disease States, 278
Correlation With Blood Pressure of the Acetylcholine-Induced Endothelium-Derived Contracting Factor in the Rat Aorta, 326
Effect of Bradykinin on Isolated Mesenteric Arteries of the Rat, II-251
Effects of Insulin on Renal Sodium Excretion, I-78
Endocrine Sodium and Volume Regulation in Familial Hyperkalemia With Hypertension, 371
